## **New Ohio Approval Allows the Advanced Enviro-Septic™ (AES) Wastewater Treatment System to be Installed Closer to Restrictive Features and with a Reduced Footprint**

Presby Environmental, Inc. is proud to announce a new Ohio statewide approval for Advanced Enviro-Septic™. AES's proven performance in reducing TSS, BOD and fecal coliform resulted in a decrease in size and distance to restrictive features in accordance with the Ohio Revised Code. AES passively (non-mechanically) treats and disperses in the same, small footprint, installs quickly and easily, is cost-effective and requires no special maintenance. AES is practical and effective with a track record of reliability and longevity.

More state approvals are pending. Presby Environmental, Inc. 800-473-5298.

## **Norweco, Inc.**

### **Norweco, Inc. is working hard to make a good thing even better...**

Norweco's Singulair® Green residential wastewater treatment system is expected to be ready for shipment to our customers near year end. Utilizing the same components and patented flow path as the precast concrete Singulair® system, Singulair® Green boasts additional advantages found only with plastic tankage.

Measuring 123" long, 66" high, 78" wide and having a gross weight of less than 900 pounds, the NSF/ANSI listed Singulair® Green system can be slipped into installations impossible to reach with concrete tankage. Operational within just a few hours after arriving at the prepared excavation site, the UL Listed/CSA Certified in-tank aerator and control center provide decades of trouble-free operation and exceptional treatment performance.

Throughout the United States, requirements for effluent monitoring are becoming more common. For these areas, Singulair® Green systems can be equipped with Norweco's Service Pro® control center. Providing direct communication with the Service Pro® remote monitoring center, through a standard telephone line, any alarm condition, including monitored auxiliary equipment, is conveyed virtually instantaneously to distributors or service providers.

Contact Norweco at (419) 668-4471 or [www.norweco.com](http://www.norweco.com) for further details or to discuss potential distributorship opportunities in your area.

## **Jet, Inc.**

### **Jet, Inc. introduces J-500 CF Nutrient Reduction Model**

Jet Inc. is proud to introduce the model J-500CF Nutrient Reduction System. The Jet model J-500CF Nutrient Reduction System utilizes intermittent aeration and additional filtration to reduce total nitrogen in treated effluent. The Jet Model J-500CF has been tested to both NSF Standard 40 and 245 for reduction of suspended solids, BOD, and total nitrogen. The Jet Model J-500CF incorporates all of the same reliable design features of standard Jet systems including the 700LL aerator, attached pretreatment tank, and patented Jet BAT Media® process. All Jet systems are delivered to the jobsite as a complete unit ready to install by the Jet network of factory trained and certified regional distributors. Please call 1.800.321.6960 or visit Jet's website at [www.jetincorp.com](http://www.jetincorp.com) for more information.

## GEOFLOW, Inc.

### **GEOFLOW, Inc. – The market may be down, but we are using this opportunity to gear up.**

Geoflow is putting together new and improved guidelines, training sessions and products to fill all your drip dispersal needs. We continue to lead the way with new and improved technology designed specifically for onsite wastewater. We soon will have a new line of control panels that are modern, simple and dependable, and a complete selection of screen and disc filters as you have requested. Geoflow continues to lead the way for subsurface drip. We provide training and support from concept through design, installation and maintenance. Our WASTEFLOW® dripline has now been used in wastewater applications for over 20 years, and has proven our claim that it is built to last with ROOTGUARD® inhibitor in each emitter and protection against slime build-up along the dripline wall. For more information please visit our website at [www.geoflow.com](http://www.geoflow.com) or call 800-828-3388 for a free Design, Installation and Maintenance Guidelines.

## Infiltrator Systems

### **Infiltrator® Systems Continues Septic Industry Leadership Role**

[Infiltrator® Systems](#) integrated solutions continue to be a benchmark for superior performance in products and service within the onsite wastewater treatment industry. Founded in 1987 and based in Old Saybrook, Connecticut, Infiltrator pioneered a more efficient and environmentally safe way to treat wastewater onsite that protects and restores groundwater resources. The company is now the largest septic products company in the onsite industry and has over 2.5 million drainfield systems installed across North America.

Infiltrator's extensive offering of innovative and environmentally conscious septic products meets stringent environmental and regulatory requirements. The company's product lines include Quick4™ and Quick4 Plus septic leachfield chambers, TW™-Series septic tanks, EZflow™ geosynthetic aggregate systems, EZset™ risers and lids, Aquaworx™ advanced treatment technologies, and Blue Diamond Corrugated pipe systems.

Through its subsidiary Champion Polymer Recycling, Infiltrator is also a leading purchaser of post-consumer and post-industrial recycled plastics annually. These recycled plastic materials go directly into the manufacturing of Infiltrator products at their ISO-9002 certified manufacturing facility in Winchester, Kentucky.

## Bio-Microbics, Inc.

### **Bio-Microbics 2010 New Product Announcements Recap**

Bio-Microbics is a world leader in onsite systems and this year was no different with the introduction of new products and an NEW mobile-friendly, interactive website, [www.biomicrobics.com](http://www.biomicrobics.com)! Be sure to pick up our new CD product catalog at the tradeshow (NOWRA, WEFTEC, and many others) that Bio-Microbics attends throughout the year.

#### **NEW PRODUCTS:**

Expanding on the FAST® product line, the new MyFAST® wastewater treatment system is designed for large-scale commercial and community projects. Offering versatility and consistently high performance, the MyFAST® utilizes multiple FAST® treatment units in one tank with one blower, for flows ranging from 40,000 gpd to 160,000 gpd.

The new SciCHLOR™ sodium hypochlorite generator is ideal for onsite disinfection. Manufactured by

Scienco/FAST ([www.sciencofast.com](http://www.sciencofast.com)), a division of Bio-Microbics, the **SciCHLOR™** is a safe, cost-effective and reliable method that uses salt and water to produce chlorine disinfectant.

**Other Bio-Microbics Headlines:**

- Received **2010 North American Technology Innovation Award** from Frost & Sullivan for the Water/Wastewater Market.
- Awarded **2009 Exporter of the Year** in the Environmental category from the Think/Global@ Commercial News USA – Official publication of the U.S. Commercial Service.
- Finalist for **Kansas Governor’s Exporter of the Year Award** in 2009 and, again, in 2010.

If you haven’t check out [Bio-Microbics](#) lately, you should...and **FAST®!**
