

#### The Onsite Event of the year!

The following presentation represent the views and opinions of Onsite Wastewater Professionals and NOT NOWRA

## Onsite 2023 Hampton, Virginia Wastewater Mega-Conference

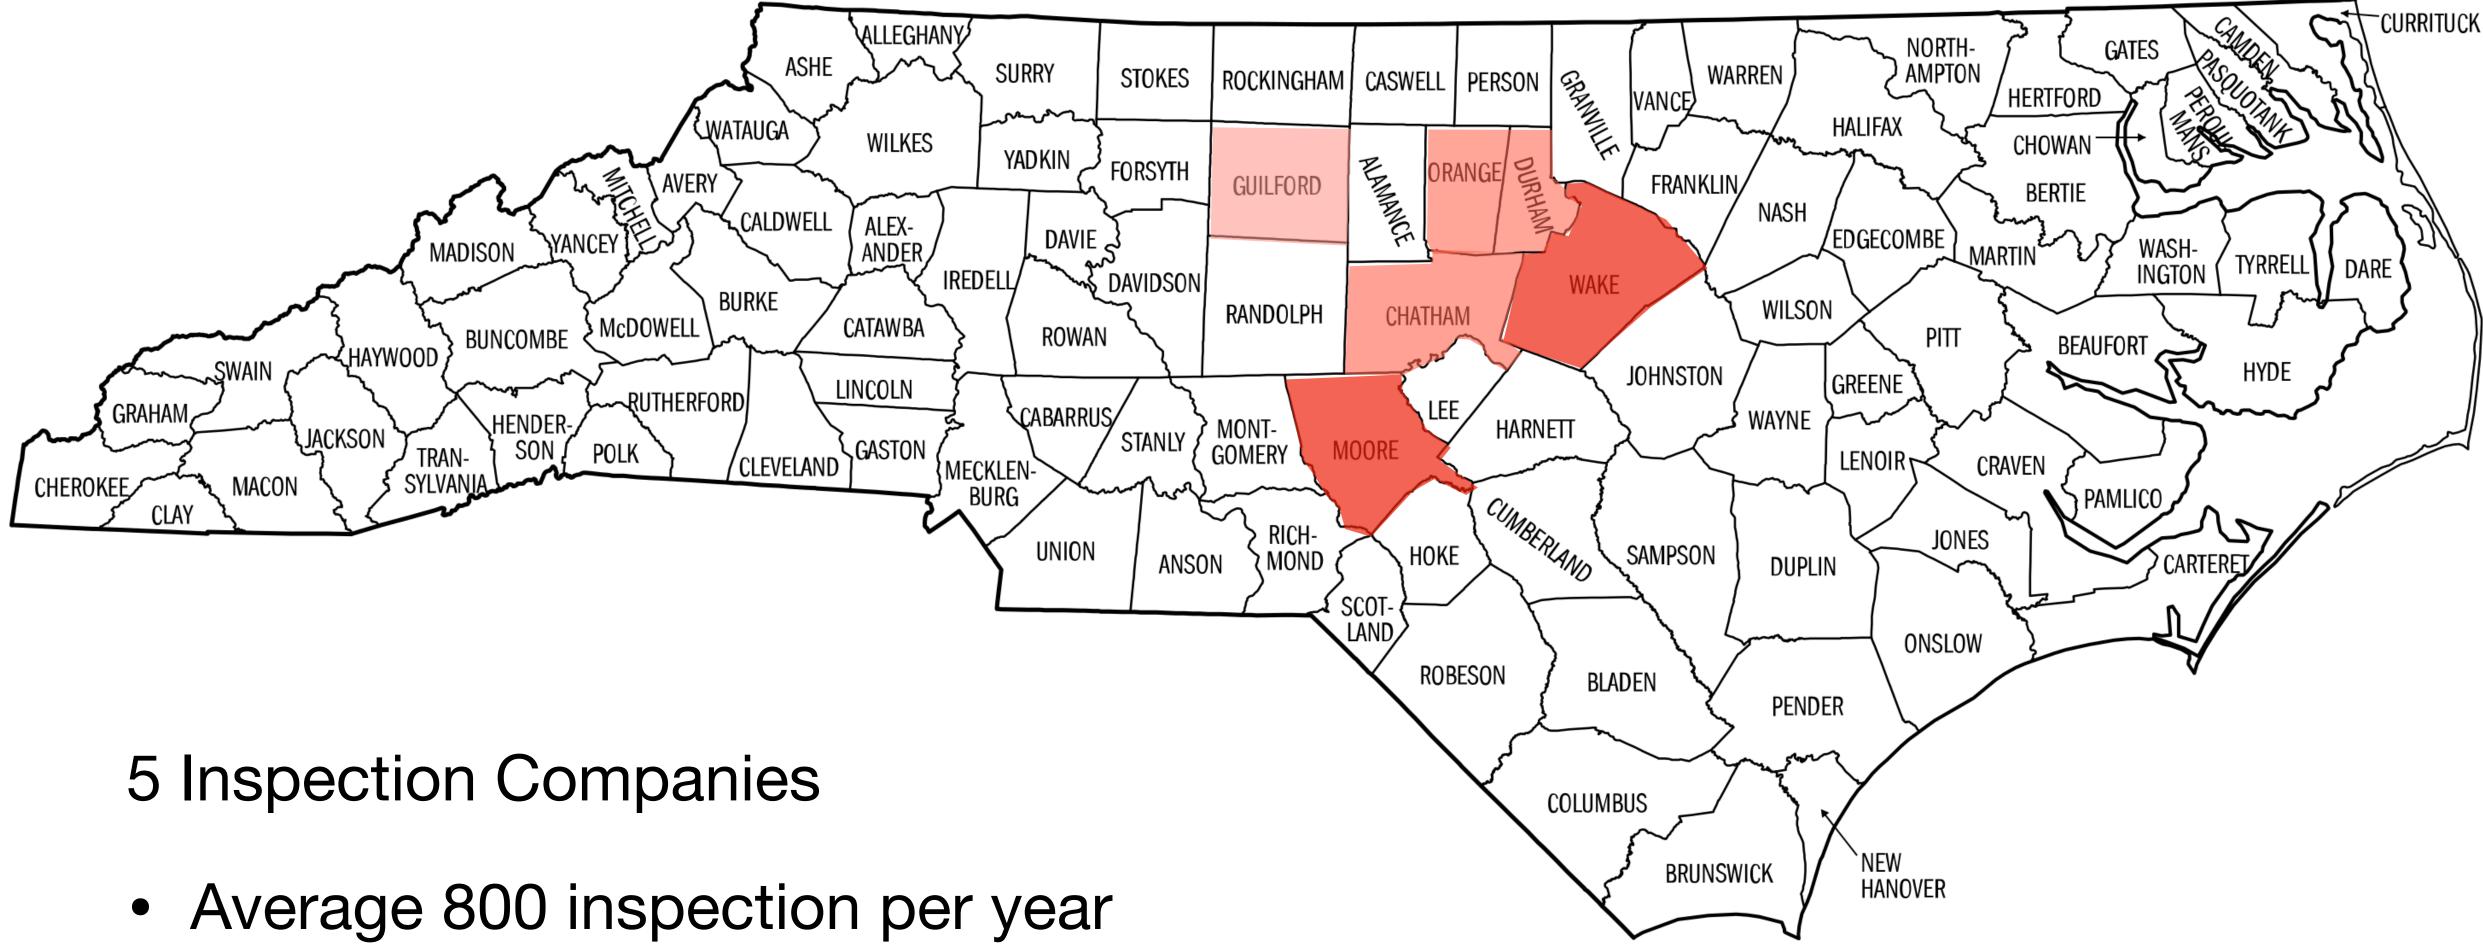

### **Framework for Success** A proven approach for Point of Sale Inspections

**Onsite Wastewater Professionals** 

#### NORTH CAROLINA

### **Point of Sale Inspections** Framework for Success Agenda

- Goals
- Landmines
- Keys for Success
- Framework
  - Requirements
  - CE
- Resources

## **Inspection Standards** Goals

- Create Uniform Standard
- Protect Onsite Professionals
- Provide Critical Information
- Manage / Set Expectations
- Set Realistic / Achievable Standard

#### Framework for Success

- Lack of Uniform Standards
- Confusion
  - •Pricing
  - Product
- Frustration
- No Ability to Differentiate

## **Framework for Success** Impact of Uniform Standards

- Consistent process leave little room for bad actors
- Promotes consistent language
- Deepens understanding of our industry
- Makes it possible to build a business

### **Framework for Success Process Must Protect Inspectors**

- Legal Protection
  - Clearly disclose what will and won't be included
  - Pre-Construction Contract

### Framework for Success Process Must Keep Inspectors Safe

- Health and Safety Protections
  - Don't ask inspectors to take unnecessary risk
  - Limit Probing
  - Don't die trying to inspect

# sake

## **Framework for Success Guiding Principles**

- The inspection will not guarantee or attempt to predict future performance
- Avoid inspection procedures that attempt to yield predictive results
- We will not advocate hydraulic load testing / Stress Testing

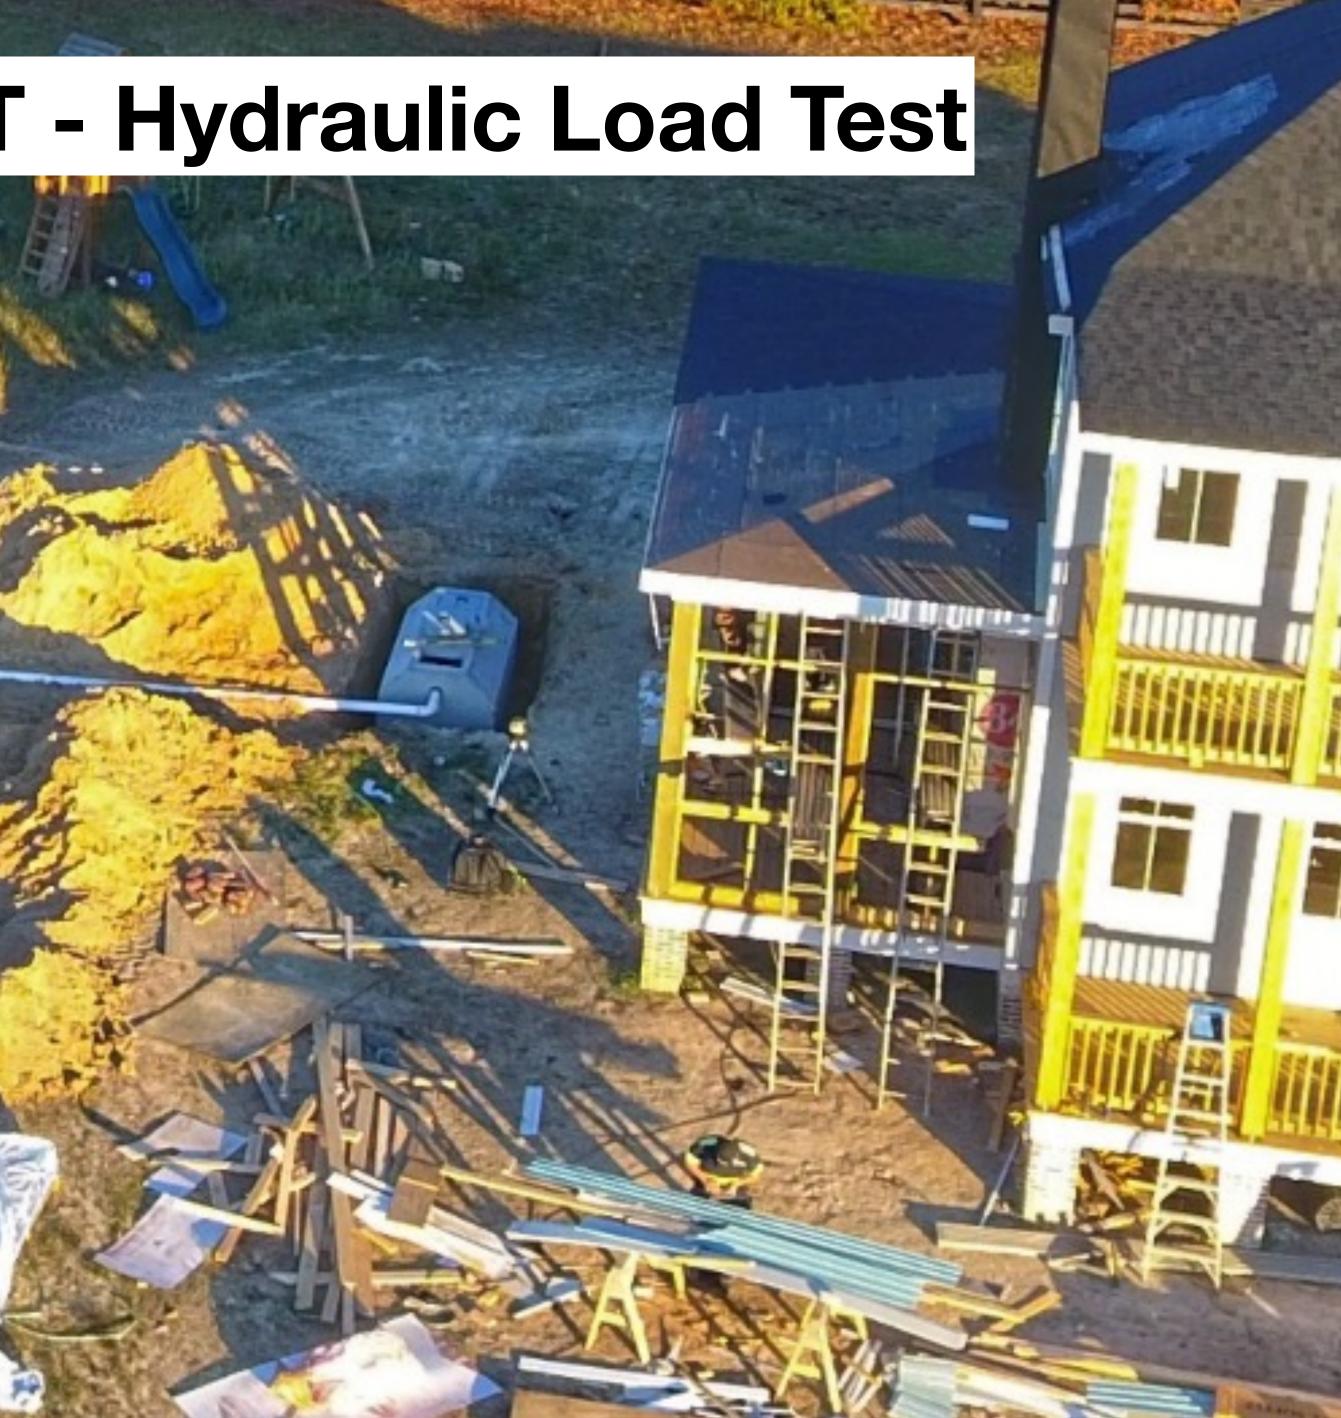

### **Operational Test - NOT - Hydraulic Load Test**

### **Framework for** Success

**Operational Test - NOT - Hydraulic Load Test** 

- 70' of 4" such 40 PVC
- 4" sch 40 PVC = .65 gallons per foot
- 45 Gallons
- Not less than 50 gallons
- Not more than 100 gallons

#### Enough to reasonably believe that effluent is getting to the trench

## **Framework for Success Guiding Principles**

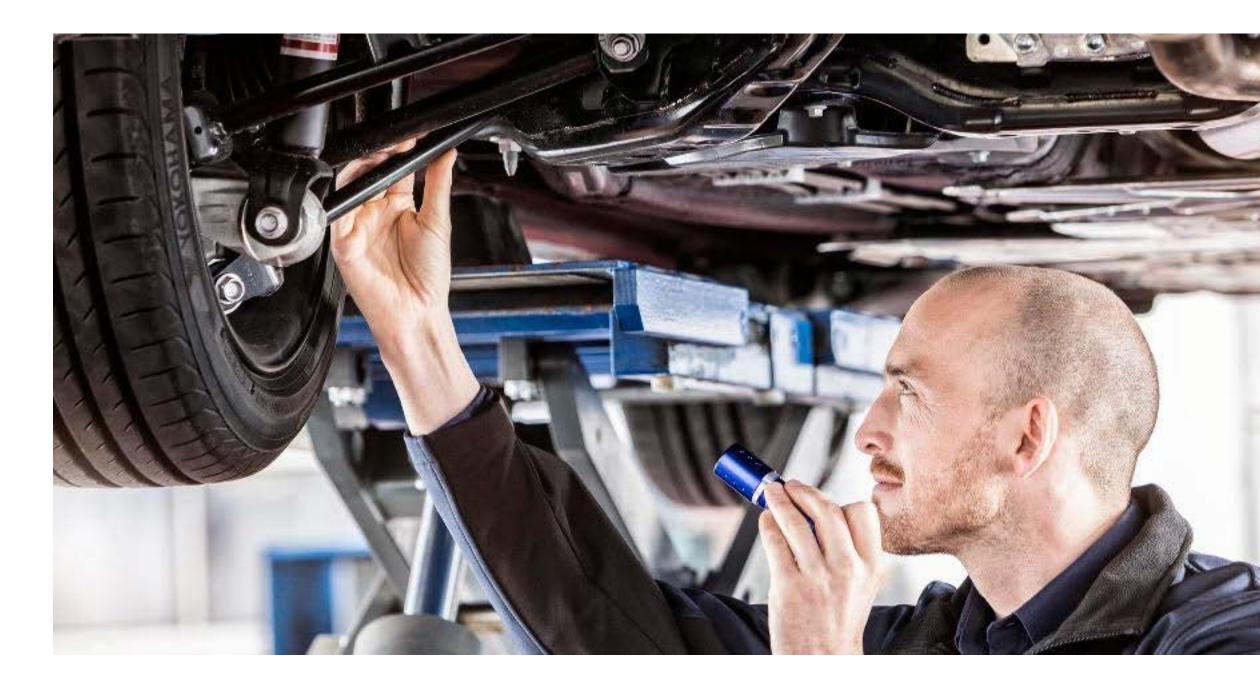

- Snap Shot in Time
  - The inspection will not guarantee or attempt to predict future performance
  - Gather Facts that speak to the condition of the system
  - We will not create a hypothesis

### **Used Vehicle Inspectio**

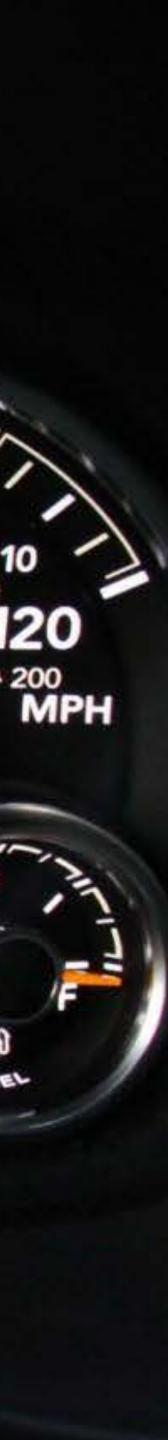

#### **MULTI-POINT VEHICLE INSPECTION CHECKLIST**

### Home Inspection of a 10 Year Old Roof

### **Class D Shingles = 90 MPH?**

#### **Residential Floors = 40 lbs / ft2**

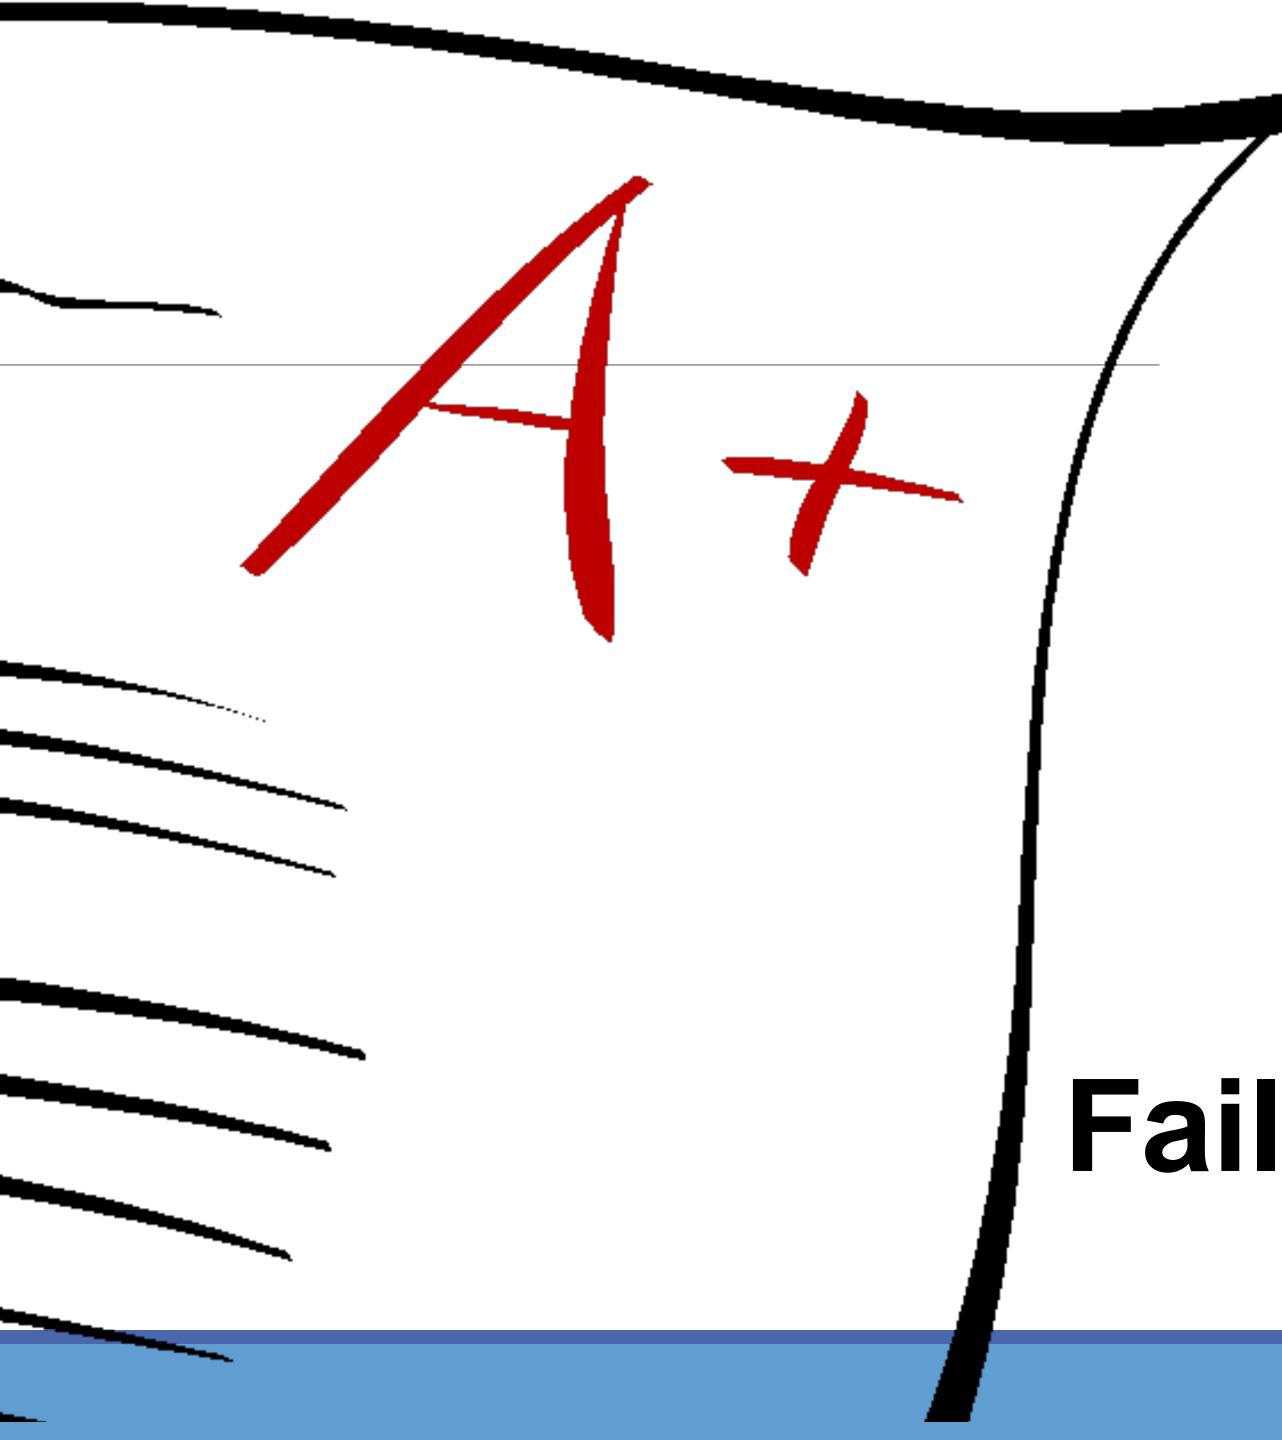

## Pass

1

## **Standard of Practice Inspection Framework**

- •What type of system do you have?
- Location
- Condition
- Signs of love or neglect
- Identify items of non compliance

## Foundational Principles

An Inspection is not
a prediction, or guarantee of future performance

An Inspection is not • An appraisal of property or system value

An Inspection is not • Troubleshooting exercise to determine the cause of problems • NOT an operation and maintenance visit

## Definitions

• Not your opinion

Collection of facts you have gathered

### An Inspection is a snapshot in time of system function

Inspectors shall at all times recognize their primary obligation is to protect the public in the performance of their professional duties and shall conduct the practice of those duties in a manner that protects the public health, safety and welfare.

Opinions expressed by inspectors in the discharge of their duties shall only be based on their education, experience, and honest convictions.

No inspector shall disclose any information about the results of an inspection without the approval of the client for whom the inspection was performed, or the client's designated representative, except as required by law.

No inspector shall accept compensation from more than one interested party for the same service without the consent of all interested parties.

of the market value of the inspected property during an inspection or in the inspection report.

Before the execution of a contract to perform an on-site wastewater system inspection, an inspector shall disclose to the client any interest the inspector has in a business that may affect the client.

# No inspector shall provide an appraisal nor express an opinion

Contractors and inspectors shall not engage in false or misleading advertising, documentation, and reporting or otherwise misrepresent any matters to the public.

No inspector shall subcontract with another inspector for an onsite wastewater system inspection without the knowledge and signed consent of the client.

#### Disclosure

- Do you pump tanks
- Do you install / repair wastewater systems
- Do you operate wastewater systems
- <sup>o</sup> Do you represent any other party
- <sup>o</sup> Did you install the system in question
- Do you operate the system in question
- Are you going to perform the inspection

# Don't share the inspection report with anyone other than the person who paid for the report.

#### **\*\*INSPECTION DETAILS\*\***

#### Services provided shall include:

- [] Inspection meeting minimum requirements
- [] Pumping of Tank
- [ ] Other (Describe): \_\_\_\_\_

Cost of Services to be provided: \$\_\_\_\_\_

#### **\*\*INSPECTOR LIMITATIONS\*\***

#### Inspector is NOT required to report on:

- 1. Life expectancy of any component or system
- 2. The causes of the need for a repair
- 3. The methods, materials, and costs of corrections
- 4. The suitability of the property for any specialized use
- 5. The market value of the property or its marketability
- 6. The advisability or inadvisability of the purchase of the property
- 7. Normal wear and tear to the system

#### Inspector is NOT required to:

- 1. Identify property lines
- 2. Offer warranties or guarantees of any kind
- 3. Calculate the strength, adequacy, or efficiency of any system or component
- 4. Operate any system or component that does not respond to normal operating controls
- 5. Move obstructions that limit access or visibility to the system
- 6. Determine the presence of hazardous substances
- 7. Determine the effectiveness of systems controlling hazardous substances
- 8. Predict future conditions or component failures
- 9. Project operating costs of components
- 10. Evaluate acoustical characteristics of any system or component

#### Inspector is Required To:

- Uncover tank lids and distribution devices unless blocked
- Probe system components where deterioration is suspected
- Report the methods used to inspect the on-site wastewater system
- Open readily accessible and readily openable components
- 5. Report signs of abnormal or harmful water entry into or out of the system

#### **\*\*CONTRACTUAL AGREEMENT\*\***

This contract must be provided by the Inspector and signed by the client or the client's

the tank needs to be pumped.

(A) Client consents to pumping the tank for

so declined \_\_\_\_\_

Signature of Client or Client's Representative

Signature of Inspector: \_\_\_\_\_

- representative prior to the Inspection being performed. Written permission from the owner or owner's representative is required to perform the inspection. This must be acquired prior to the inspection.
- Client requesting this inspection has been advised that for a complete inspection to be performed

а	compl	lete	ins	pection

About Us Home

#### **Onsite Wastewater Professionals Certified Septic Inspector Online Training**

#### **Septic Inspector Certification**

Our Inspection Certification Program offers a comprehensive training and evaluation pathway for professionals in the septic industry. It emphasizes a thorough understanding of inspection techniques without relying on pass/fail metrics. Instead, we focus on providing a detailed snapshot of a system's present condition. This certification ensures that inspectors are well-equipped to provide transparent, detailed, and objective assessments for every onsite wastewater system they encounter.
