Strategies for Addressing Onsite Difficult Sites

for Septic System Professionals
University Place, WA

Free two-day in-person training for septic system professionals with an optional third day Train-the-Trainer course (no-cost)

- **Day 1: May 13, 2025**
8:00AM-5:00PM (Pacific Time)
- **Day 2: May 14, 2025**
8:00AM-5:00PM (Pacific Time)
- **Day 3 (optional TTT*): May 15, 2025**
8:00AM-3:00PM (Pacific Time)

Washington On-Site Sewage Association will be awarding six Continuing Education Units to Washington State septic system professionals who attend this course.

[Register here](#)

This free advanced workshop focuses on solutions for new construction and techniques for expanding or repairing failing onsite and decentralized systems. Participants will explore wastewater contaminants, management options and the differences between decentralized and onsite treatment systems. Through a combination of presentations, hands-on activities and case studies, attendees will learn to assess site limitations, address design challenges and develop cost-effective solutions. Practical exercises, including wastewater mass balances, site assessments and wastewater characterization will expand your skills to manage complex wastewater system designs and site constraints with confidence. Register today, at no cost to you!

*The purpose of the Train-the-Trainer (*optional third day*) training is to provide technical assistance providers and onsite system professionals with the skills and strategies needed to inform and educate their peers on options for new construction, expansion or the repair of a failing onsite or decentralized wastewater treatment system when proposed on a difficult site.

Led by NOWRA's Bruce Lesikar and Marcia Degen.
