<u>In-Person Train-the-Trainer</u>: Decentralized System Operation and Maintenance

Skills for Promoting System Longevity!

The goal of this training course is workforce development related to system management including the operation, maintenance, monitoring, and troubleshooting of decentralized systems. The course describes fundamental concepts of wastewater characteristics and treatment processes and illustrates the importance of periodic operation and maintenance to ensure longevity and optimal performance. The content establishes uniform standards of practice that service providers can employ to assess and report upon the status of system source, collection, treatment and dispersal components as part of system management. The content also includes troubleshooting tools and critical safety protocols for operation and maintenance activities.

The primary target audience for this module is service providers with specific focus on those who maintain onsite/decentralized wastewater treatment systems. The secondary audience includes local and state-level permitting staff, designers, engineers, and soil scientists. While the concepts are also applicable to the public (property owners, real estate professionals and others), the level of technical detail may be excessive.

WHEN?

Tue, April 22, 2025 Wed, April 23, 2025 6:00 PM - 7:00 PM 8:00 AM - 5:00 PM

Thur, April 24, 2025 Fri, April 25, 2025 8:00 AM - 5:00 PM 8:00 AM - 3:00 PM

This is a four-day workshop. Attendance at all days is required.

WHERE?

Courtyard by Marriott Nashua 2200 Southwood Drive, Nashua, NH 03063

PRESENTED BY:

Bruce Lesikar, NOWRA
Gary Hawkins, University of Georgia & NOWRA

<u>Please note:</u> There is no cost to attend, however advance registration is required.

RCAP is an equal opportunity provider and employer and does not discriminate against qualified individuals with disabilities.

WORKSHOP WILL PROVIDE INFORMATION ON:

- Onsite Wastewater Treatment Systems (OWTS) components and treatment methodologies
- Advanced treatment systems
- How to customize training and marketing materials based on locations and audience

This workshop is made possible thanks to funding from the U.S. Environmental Protection Agency (EPA).
